SECTION 0343 – EGGERY, AMATEUR

CRITERIA FOR JUDGING EGGERY

- **Overall Effect:**
 - The total composition should be pleasing and interesting - the products of all elements together; i.e., intensity, value, color scheme, center of interest area, and light source.
- **Color Management:**
 - The use of color scheme, color repetition, tints, accents, warm and cool colors.
 - Pleasing color balance, repetition of flow of colors throughout the painting, which allows the eye to travel through the painting.
- **Value Control:**
 - How light or dark an object is overall or the change from light to dark within an object, which creates form.
 - Lack of value control makes for distractions and/or flat objects.
- **Intensity Control:**
 - The brightness or dullness of a color or objects.
- **Stroke Control:**
 - Strokes must be pulled with consistency, show flow and control.
 - Comma strokes should have nicely rounded beads flowing into well-tapered tails.
- **Blending Skills:**
 - A graduation of values from light to dark, should be smooth without blotches or visible value lines.
 - No over or under blending apparent.
- **Line Work or Details:**
 - Should be controlled and consistent, showing evidence of practice and attention given to details.
- **Background:**
 - Needs to support and enhance the overall composition. Good use of color scheme, cast shadows and light areas from light source and antiquing.
- **Neatness:**
 - Should have an overall neat appearance with no evidence of tracing lines (except watercolor), misshapen objects or evidence of clean up or untidy edges.
- **Finish:**
 - Should provide adequate protection for the painting without impurities and be skillfully applied.
 - The back of objects should also be finished.

EGGERY GUIDELINES

- **Beaded and Jeweled Eggs:**
 - Two-thirds (2/3) of the outer eggshell must be beaded or jeweled.
 - Work should be neat and clean with no visible glue.
 - Rows must be straight; no beads loose or missing; no string visible.
 - Beads should lay flat against the shell and be smooth and even.

- Degree of difficulty is determined by size and type of beads/jewels and pattern in which they are applied.
- Larger beads cover more space and generally are considered less difficult than smaller beads.
- Fused beads and rhinestone chain are considered far easier to apply than strung beads or individual crystals and this should be taken into account when judging the eggshell.
- Various beads and/or jewels may be used.

- **Diorama Category (Scenes):**

- Egg should focus on a three-dimensional scene built within the shell.
- May have any number of openings, with or without doors.
- Should have a background, mid-ground and foreground.
- Glitter does not count as a dimensional component.
- Unique and intricate eggs should earn more points.
- No glue should show and all blow holes should be properly covered.
- Figures should be in proportion to each other and in proportion to the egg shell used.
- Exterior design should tie in with the interior design.

- **Hand Painted Category:**

- An egg on which a design is created by hand using a paint medium.
- The artist must paint the image free-hand.
- Toile and one-stroke usually not allowed in this category.
- Judged on the ability to create depth, shadow and distance as well as proper color coordination.
- A coat of paint applied to the shell is not considered "hand painted".
- At least one-third (1/3) of the outer shell should be painted with the design.

- **Hinged, Jewelry Boxes:**

- The above applies as far as beaded, jeweled, diorama or hand-painted.

- **Christmas:**

- Christmas category rules would apply under diorama or hand painted category.
